

Regionale midler til forskningsbasert innovasjon – innstilte søknader høsten 2021

Prosjektets tittel	Søkerinstitusjon	Prosjektleder
A new biotechnology company developing and marketing a unique product to treat and prevent heroin intoxication and abuse	Oslo universitetssykehus HF	Jan Terje Andersen
DELINEATE: Development of Clinical Assay to Predict Treatment Response in Breast Cancer	Oslo universitetssykehus HF	Mads Haugland Haugen
Developing TREM2-agonists for Alzheimer's disease	Oslo universitetssykehus HF	Lars Nilsson
Development of a novel targeted therapy for multiple cancer types	Oslo universitetssykehus HF	Fahri Saatcioglu
EG103, A new drug for head and neck cancer	Oslo universitetssykehus HF	Anette Weyergang
Gene therapy for osteoarthritis and other inflammatory conditions	Oslo universitetssykehus HF	Jan E. Brinchmann
MESSVESS-AI: Machine learning for automatic creation of patient-specific vascular maps during colon cancer surgery	Akershus universitetssykehus HF	Dejan Ignjatovic
New drugs against tuberculosis (stopTB)	Oslo universitetssykehus HF	Tone Tønjum
Novel therapeutic strategies to target glioblastoma	Oslo universitetssykehus HF	Deo Prakash Pandey
Pharmacological inhibition of the aortic valve calcification	Oslo universitetssykehus HF	Arsenii Zabirnyk
Pump-less organ-on-a-chip platform – upscaling and standardization	Oslo universitetssykehus HF	Mathias Busek
Radio frequency for sensing in multi-node leadless cardiac pacemaker technology	Oslo universitetssykehus HF	Ilangko Balasingham
Super APC with targeted DNA vaccine	Oslo universitetssykehus HF	Ranveig Braathen
The high efficiency capture of circulating cancer cells in liquid biopsy assay	Oslo universitetssykehus HF	Vessela N. Kristensen
