

**Regionale midler til forskningsbasert innovasjon  
– innstilte søknader høsten 2022**

<b>Prosjektets tittel</b>	<b>Prosjektleder</b>	<b>Søkerinstitusjon</b>
Biomarker guided ADC therapy in cancer	Anette Weyergang	Oslo universitetssykehus HF
CAR T cell therapy for treatment refractory HER2+ cancer	Jon Amund Kyte	Oslo universitetssykehus HF
ChIP-seq in cancer screening and diagnosis in serum cell free DNA	John Arne Dahl	Oslo universitetssykehus HF
Clinical introduction of OSCAR-3	Sébastien Wälchli	Oslo universitetssykehus HF
Defining Novel R-Loop Inhibitors for Prostate Cancer Therapy	Adam Filipczyk	Oslo universitetssykehus HF
New approach to pharmacological treatment of heart failure	Ana Isabel Costa Calejo	Oslo universitetssykehus HF
Novel enzymatic inhibitors to combat pancreatic cancer	Lars Eide	Oslo universitetssykehus HF
Novel therapeutic strategies to target glioblastoma	Deo Prakash Pandey	Oslo universitetssykehus HF
Pre-clinical development of novel peptide-based antibiotics derived from a platform technology	Magnar Bjørås	Oslo universitetssykehus HF
RecoVRy	Jan Ivar Røssberg	Oslo universitetssykehus HF
Slimstitch - less invasive obesity treatment	Christer Julseth Tønnesen	Oslo universitetssykehus HF
T cell derived extracellular vesicles as tumor targeting drug delivery vehicles	Audun Sverre Myrset Kvalvaag	Oslo universitetssykehus HF
Verification of a next generation antibody design against hard-to-kill cancer in a human immune system mouse model	Jan Terje Andersen	Oslo universitetssykehus HF
